

Changes to our range of couplings

WABCO offers a wide range of high quality couplings from renowned manufacturers. Besides our own products, we are also a reliable supplier of all system components for various vehicle control systems.

There has been a change to our list of couplings suppliers: Anoflex has discontinued its range for commercial vehicles. Thus Anoflex items will need to be replaced by equivalent products from a different brand.

The RO system for quick-release couplings will be discontinued. We will continue to offer the P5 quick release coupling system from Raufoss as an alternative. Please note that RO and P5 are not compatible.

The table below shows you a suitable replacement for the main selection of brass couplings. Please note that a number of sales sets and the 893 000 200 0 fittings case will be adapted. A revised version of the couplings catalogue will be available in the 3rd quarter. If you have any questions, please contact your WABCO partner.
