

COILED TUBES: MATERIAL CHANGE FROM PA12 TO HYTREL®

The material for coiled tubes with the product range 452 711 xxx 0 will be changed from PA12 to HYTREL® 6646, due to unstable availability of PA12-material and homogeneity of the material.

IMPORTANT TO KNOW

- Release date is week 31, 2013
- New part numbers are 1:1 replacement
- The old part numbers will not be available anymore (stocks will be used)
- Neither the performance, nor the dimensions of the parts will be affected by this change
- The new parts are according to ISO 7375. The old coiled tubes are according to DIN 74323. (ISO 7375 is equivalent to DIN 74323, but without additional material specification)
- The marking on the tubes will indicate the new material (ISO7375 + part number)
- The gross prices stay unchanged

The material and the tubes have been tested thoroughly by our supplier and have been validated as the right replacement for the material PA12. You can find the material characteristics & specification under this [link](http://plastics.dupont.com/plastics/dsheets/hytrel/HYTREL_6646_NC010.pdf) (http://plastics.dupont.com/plastics/dsheets/hytrel/HYTREL_6646_NC010.pdf).

To avoid typing part numbers in your data systems, please find a zipped Excel file to [download](http://inform.wabco-auto.com/intl/pdf/zip/pa12_hytrel_corrected.zip) (http://inform.wabco-auto.com/intl/pdf/zip/pa12_hytrel_corrected.zip).
