

NEW REMANUFACTURED AIR COMPRESSOR FOR THE IAM

WABCO Reman Solutions offers a remanufactured air compressor **412 704 008 R** for the Independent Aftermarket (IAM) as an addition to its current product portfolio.

The remanufactured compressor provides the same quality and high performance levels as a new unit.

BENEFITS FOR THE CUSTOMER

Remanufactured WABCO products meet the highest quality standards because they are produced and tested according to the same technical specifications as new ones. That is why we grant the same warranty as for our new products.

Thanks to WABCO Reman Solutions, customers get access to high quality components at a reduced price. This is possible because the remanufactured part uses an existing part (core), so we can offer remanufactured products at a lower price than new ones.

* Compressor 412 704 008 7 will be withdrawn from the market on: 1st of January 2015.

CORE RETURN

Air compressors are invoiced with a surcharge that will be refunded upon the return of the core (used part).

Additional information and the Core Return Guidelines (available as PDF file for download) can be found at the website [MyWABCO](https://www.am.wabco-auto.com) (<https://www.am.wabco-auto.com>).

The return process is operated via authorised WABCO partners. Please contact your [WABCO partner](#) (www.wabco-auto.com/findwabco) to find out whether you need to return cores or require further information.

BENEFITS OF REMANUFACTURING

- Reduces material use, preserves natural sources
- Waste reduction
- Extends product life-cycle

IN LINE WITH WABCO VALUES

With the launch of new remanufactured products WABCO continually helps to reduce environmental pollution. By purchasing our Green Label Reman products, which are similar to new WABCO products in terms of functionality and performance, you support WABCO's endeavour for greater sustainability.

Safety is one of the key values at WABCO, which is why, new remanufactured compressors provide the same quality and high performance levels as new units.

All production operations are powered by rigorous Six Sigma Lean processes with the additional assurance of ISO TS 16949:2009 certification.

ABOUT WABCO REMAN SOLUTIONS

Formed by WABCO in 2010, WABCO Reman Solutions specialises in remanufacturing electronic, mechatronic components, and traditional mechanical products made by WABCO as well as other manufacturers. WABCO's remanufactured products serve original equipment manufacturers, as well as tier-one and tier-two suppliers, on a global basis.

WABCO Reman Solutions has facilities in Rochester Hills, Michigan, USA; Stanowice, Poland; Jinan, China; and a joint operation in San Luis Potosi, Mexico.

ISO/TS 16949:2009 certification demonstrates that WABCO Reman Solutions is recognized as a premier automotive parts remanufacturer, providing customers with high quality, cost effective products and services. In 2014, WABCO Reman Solution has twice been awarded the title of '**Heavy Duty Remanufacturer of the Year**' and '**Most popular Remanufacturer in China**'.

WABCO Reman Solutions is also a member of many world-wide associations, such as APRA, MERA, Remanufacturing Industries Council, Inc.
