

UPGRADE OF CLUTCH AND ACTUATION UNIT ON WABCO CLUTCH COMPRESSOR RANGE

As a global leader in compressed air braking systems, WABCO offers a comprehensive range of air compressors.

Within our range of clutch compressors, we upgraded the clutch and actuation units to improve the performance. This change supports higher torque transfer and extends lifetime of the clutch system.

To maintain reparability of upgraded compressors WABCO also introduces a new range of repair kits. Due to the technical upgrade old repair kits for clutch and actuation units are no longer available. Also old and new repair kits are not compatible. Therefore, if clutch or actuation unit needs to be repaired with new repair kit the counterpart also needs to be replaced.

Vehicle brand	Compressor	No longer available		New	
		Old Repair Kit Clutch	Old Repair Kit Act. Unit	New Repair Kit Clutch	New Repair Kit Act. Unit
