## 1 List of abbreviations

| ABBREVIATION | MEANING  |
|--------------|--|
| <b>ABS</b>   | Anti-Lock Braking System   |
| <b>BVA</b>   | (German: Bremsbelagverschleißanzeige); brake lining wear indicator   |
| <b>CAN</b>   | Controller Area Network; asynchronous serial bus system for networking control units in vehicles                   |
| <b>DIN</b>   | (German: Deutsches Institut für Normung); German Institute for Standardisation                                     |
| <b>ECU</b>   | Electronic Control Unit  |
| <b>ECAS™</b> | Electronically Controlled Air Suspension   |
| <b>eTASC</b> | Electronic Trailer Air Suspension Control; rotary slide valve with RTR and ECAS™ functions                         |
| <b>GIO</b>   | Generic Input/Output   |
| <b>HDSCS</b> | Heavy Duty Sealed Connector Series; sealed plug connection   |
| <b>ILS</b>   | (German: Integrierte Liftachs-Steuerung); Integrated lifting axle control  |
| <b>ISO</b>   | International Organization for Standardization   |
| <b>ISS</b>   | Integrated Speed Switch  |
| <b>IVTM</b>  | Integrated Vehicle Tyre Monitoring system for commercial vehicles  |
| <b>LIN</b>   | Local Interconnect Network; specification for a serial communication system, also called LIN bus; sensor interface |
| <b>MRV</b>   | (German: Magnetregelventil); Solenoid control valve  |
| <b>PREV</b>  | Park Release Emergency Valve   |
| <b>RGE</b>   | Running gear; external system  |
| <b>RSS</b>   | Roll Stability Support   |
| <b>RtR</b>   | Return to Ride; return to normal level (air suspension)  |
| <b>RV</b>    | Relay valve  |
| <b>TASC™</b> | Trailer Air Suspension Control; rotary slide valve with RtR function   |
| <b>TEBS</b>  | Electronic Braking System for Trailers   |
| <b>TH</b>    | Traction Help; low-speed traction control  |
| <b>VCS</b>   | Vario Compact System   |

## 2 General information

### Purpose of this document

This document gives an overview of the different cables used by WABCO.

### WABCO Academy

<https://www.wabco-academy.com/home/>

### WABCO Online product catalogue

<http://inform.wabco-auto.com/>

### Registered trademarks

ECAS™, OptiLink™, OptiTire™, TailGUARD™, TASC™, TrailerGUARD™ and TX-TRAILERGUARD™ are registered trademarks of WABCO and may not be used by third parties without the consent of the owner.

### Unavailable products

Some products are illustrated in this publication which are not or only partly available. This is intended to serve as information for our customers, and to help them find alternatives for the respective products if necessary.

## 3 Installation instructions

### Connector assembly

- Protect the plug connections against environmental influences (moisture, dust, dirt) during the assembly.
- Make sure that the seals are on the cable connector and that they are undamaged and clean.
- The use of additives such as contact spray, contact grease or cold cleaner in the connector area is not permitted without the approval of WABCO. These substances can damage the seals and plastics.
- Plug the cable connectors completely onto the matching counterparts. All contacts must fit cleanly into one another. Then lock the plug connection in its end position.
- The ISO 7638 socket must be mounted tilted downwards at an angle of between 0° and 30°. Otherwise water could collect in the plug when coupling / uncoupling the connection. Connect any unused ISO 7638 plugs to the parking receptacle.

### Laying and fastening the cables

- The cables must not be sharply kinked directly after the connector. Keep the cable straight for 1x the connector length (H) after the connector. Reference value: approx. 100 mm from the end of the connector.
- Observe a minimum bending radius (R)  $\geq 10x$  cable diameter (D). Reference value: 100 mm. Kinked cables and heavy cable bundles are not permitted and can cause damage and unforeseeable failures.
- Fasten the cables and connectors so that the plug connections are not subjected to any tensile stress or lateral forces.
- Secure the first cable fixation max. 300 mm after the plug connection (see illustrations below).
- Only fasten cables to elements that are rigidly attached to the component, e.g. the vehicle frame. Fastening cables to flexible elements can cause cable breakages and the seal could break. Prevent any relative movement between the cable and the component (exception: wheel sensors).
- Make sure that the cable ties are not excessively tightened. This can cause damage to the cable sheath and copper strands. The maximum tensile forces stipulated by the manufacturer must not be exceeded. Use cable ties that are as wide as possible ( $> 4.7$  mm). Avoid attaching them tightly to flexible, pulsating elements such as hoses. For safety reasons, special cable ties (e.g. WABCO 894 326 012 4) should be used for critical installations.
- Take protective measures when routing cables in hazardous areas (e.g. sharp edges, aggressive media, high temperatures).
- Seal open-ended cables separately or route them into a waterproof junction box.

# Installation instructions

## Solenoid valve cable

$$R \geq 10 \times D$$

## Supply cable

## TEBS D modulator

## TEBS E modulator

## 4 Cable List

| Part Number   | Designation / Use   | System / Chapter                         | Page(s)        |
|---------------|---|--|----------------|
| 441 032 XXX 4 | Protective cap for sensor connection                            | TEBS D                                   | 46             |

| 898 020 456 4      | Protection cap for bayonet             | Various                     | 113            |
| 898 020 462 2      | Protective cap for GIO                 | Different systems           | 34             |
| 898 020 463 2      | Protective cap for subsystem           | Different systems           | 34             |

\*Available in several versions or lengths.

### 5 System overview

A – TEBS E – p. 16

B – Electronic extension module – p. 30

C – TEBS D – p. 36

D – EBS towing vehicle – p. 47

E – CAN router / CAN repeater – p. 48

F – VCS II – p. 52

G – VCS – p. 62

H – Vario C – p. 67

I – ECAS™ – p. 70

J – Trailer Central Electronic – p. 75

K – Electronic air suspension module – p. 83

L – OptiTire™ / IVTM – p. 85

M – TrailerGUARD™ – p. 88

N – Brake lining wear – p. 91

O – Solenoid valve cable – p. 93

P – Sensor cable – p. 100

Q – Miscellaneous – p. 107

## Accessories Vario C

### Bottom part of box

#### Part Number

446 105 012 4  
(connections: 2x PG 16, 10x PG 11)

446 105 015 2  
(connections: 1x PG 16, 10x PG 11,  
incl. cable set 894 604 430 2 and cap 894 020 314 2\*)

### Cable harness

#### Part Number

446 105 535 2\*

### ABS equipment pack Vario C

#### Part Number

446 105 530 2  
446 105 538 2  
(as 446 105 530 2, but with green supply plug)

### Cable fitting

#### Part Number

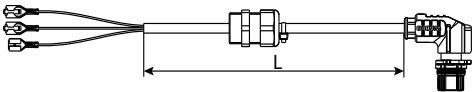

894 130 312 2  
(PG 11 for cable Ø 5 mm - 10 mm)

894 130 315 2\*  
(PG 16 for cable Ø 10 mm - 14 mm)

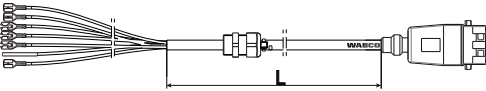

# 14 ECAS™

## ZF Friedrichshafen AG

ZF is a global technology company and supplies systems for passenger cars, commercial vehicles and industrial technology, enabling the next generation of mobility. ZF allows vehicles to see, think and act. In the four technology domains Vehicle Motion Control, Integrated Safety, Automated Driving, and Electric Mobility, ZF offers comprehensive solutions for established vehicle manufacturers and newly emerging transport and mobility service providers. ZF electrifies different kinds of vehicles. With its products, the company contributes to reducing emissions and protecting the climate.

ZF, which acquired WABCO Holdings Inc. on May 29, 2020, now has 162,000 employees worldwide with approximately 260 locations in 41 countries. In 2019, the two then-independent companies achieved sales of €36.5 billion (ZF) and \$3.4 billion (WABCO).

With the integration of WABCO, the leading global supplier of braking control systems and other advanced technologies that improve the safety, efficiency and connectivity of commercial vehicles ZF will create a new level of capability to pioneer the next generation of solutions and services for original equipment manufacturers and fleets globally. WABCO, with almost 12,000 people in 40 locations worldwide, will now operate under the ZF brand as its new Commercial Vehicle Control Systems division.
